

SPECIFICATION

Model	Symphoni High Output	Symphoni (Low Power)
Operation	2 Hours Continuous	Continuous
Operating Voltage Range	9-28 Vdc	12-30 Vdc
Sound Output @ 1 metre	Up to 120dB(A)	100dB(A) +/- 2dB(A) @ 24 Vdc
Current Consumption	240mA +/- 20mA on tone 3	5mA +/- 1mA
Tones	1 to 32 see table	Alternating 990Hz / 650Hz at 2Hz Continuous 990Hz Intermittent 990Hz, On/Off at 1Hz
Synchronisation	Synchronised start	Synchronised Start
Frequency Stability	+/- 0.15%	+/- 0.5%
Operating Temperature	-25°C to +55°C	-25°C to +70°C
Line Monitoring Method	Polarised Input	Polarised Input
Construction	ABS Plastic Case	ABS Plastic Case
Ingress Protection	IP42	IP42
Dimensions	See Drawings	See Drawings
Weight	0.58 kg	0.212kg

Symphoni Sounders

The Symphoni sounder is a general purpose internal sounder, available either as a very high output sounder for noisy areas or a high output low current sounder for applications where power is limited. Both versions share the same horn and a back box, which has double cable entries for ease of installation.

Symphoni High Output

This sounder offers very high sound outputs while retaining tone compatibility with the Roshni, Squashni and Askari products. The high output and range of alarm tones suits the sounder to noisy environments and general alarm signalling. The tone compatibility with other products provides the system designer with great flexibility and potential for economies in systems application.

- ULTRA HIGH 120dB(A) OUTPUT
- 32 TONES
- LOW CURRENT TO REDUCE POWER SUPPLY REQUIREMENTS
- COMPATIBILITY WITH ROSHNI, SQUASHNI, ASKARI
- SYNCHRONISED START
- DOUBLE ENTRY BACKBOX FOR SIMPLIFIED INSTALLATION

Symphoni (Low Power)

The innovative design used for this version of the sounder allows outputs of up to 100dB(A) for a current consumption of only 5mA.

The low consumption lends itself to operation from the limited power available from loop driven systems and the sounder includes facilities for fixing address circuit boards. The sounder has three selectable tones, which may be employed for one, two or three stage alarm applications.

- LOW 5mA CURRENT CONSUMPTION
- 100dB(A) SOUND OUTPUT
- SYNCHRONISED START
- SUITABLE FOR MULTI-STAGE ALARM APPLICATIONS
- DOUBLE ENTRY BACK BOX FOR SIMPLIFIED INSTALLATION
